READING THE GRID

- Pairs run down the diagonal.
- **s**, above the diagonal: suited, both cards the same suit.
- **o**, below it: offsuit, two different suits.
- **T** is a ten.

WHAT IT SHOWS

- Best: AA at 85%. Worst: 32o at 32%.
- Being suited adds about two to four points.
- Any pair is at least even money against one random hand.

WHAT IT LEAVES OUT

These are odds against one random hand, all the way to the river. Real opponents do not hold random hands, and position and bet sizes matter. Use it to compare hands, not as a rule for which to play.

Each figure comes from 400,000 simulated deals with ties counted as half a win, so it is accurate to about a fifth of a percentage point.
